

Landscapers Pride “Playground Pillow” Engineered Wood Fiber Safety Surfacing Quality Assurance Statement

Description:

Landscapers Pride “Playground Pillow” is produced by grinding virgin hardwood and or softwood chips into consistently sized engineered wood fibers. The produced fiber has several characteristics making it a desirable playground safety surfacing material. LP “Playground Pillow” is a non-toxic product comprised of only virgin wood fibers. It contains no recycled wood product, or any wood containing paint, chemicals, or additives. When properly installed, LP Playground Pillow provides a playground surface which meets current ASTM standards F-1292 and F2075.

Product Certifications:

Landscapers Pride “Playground Pillow” safety surfacing is fully certified in accordance with all current applicable standards for an engineered wood fiber playground safety surfacing material under and around playground equipment.

1. In the interest of public playground safety, the International Play equipment Manufacturers Association (IPEMA) provides a third party testing organization/validator certification service whereby an independent laboratory, TUV SUD America, Inc. (TUV SUD), validates a manufacturers’ certification of conformance to ASTM F1292 Standard Specification for Impact Attenuation Under & Around Playground Equipment. The use of the IPEMA Playground Surfacing Certification Seal signifies that Landscapers Pride “Playground Pillow” has received written validation from TUV SUD that a specified thickness of the product associated with the seal conforms with the requirements of ASTM F1292 at a specified critical height and has certified the associated product is made with the same materials in the same manner as the original representative product sample validated by TUV SUD. A list of current validated products, their thickness and critical height may be viewed on IPEMA’s website: www.ipema.org
2. ASTM F2075 Standard Specification for Engineered Wood Fiber for use as a Playground Safety Surface Under and Around Playground Equipment, as may be amended from time to time. Establishing the minimum characteristic for those factors that determine particle size, consistency, purity and the ability to drain. Landscapers Pride “Playground Pillow” has passed the magnetic tramp metal test, which is also an IPEMA monitored certification program. The Certification may be viewed at www.ipema.org
3. ASTM F1292 Standard Specification for Impact Attenuation of Surface Systems Under and Around Playground Equipment. Landscapers Pride “Playground Pillow” when tested according to ASTM F1292 will have a critical height of 8ft minimum. Twelve inches of LP “Playground Pillow” wood fiber when tested according to ASTM F1292, will have a critical height of 12-ft minimum.
